**QUESTION: Have you ever been verbally attacked with sexually charged remarks in the street by a guy or a group of guys?**

# Spanish Les & Bi

A security man of the university found my girlfriend and me kissing and touching each other secretly. He allows my girlfriend go away but not me. He told me that if we were a straight couple he would have left us alone. Then he started touching me up improperly and I was so silly to let him do so because I feared being publicly reported.

People used to say that I was a lesbian because I had a mental illness or due to any sexual harrassment suffered during my childhood. They call you depraved and inmoral, they insult me in the Street and they invent things about you. I remember a day, at high school, a boy threatened us with a knife to force us to have sex with him until we love it.

A “flashing” (or indecent exposure) from a roommate, who forced me to look at him while he was masturbating. He told me “you’ve never seen a dick that big” before ejaculating. He suspected I was lesbian.

**My girlfriend and I, we were waking together, holding our hands and a man followed us while masturbating himself.**

My girlfriend and I, we have been followed in the Street to be attacked. There are always men who try to hook up with us in an unproperly and invasive way. Several times they have masturbated before us while looking us together.

**Men masturbating in a public place near me and my girlfriend. We have been asked for a trio by several unknown men in the Street.**

Being with my partner/girlfriend in a swamp, a man sitted besides us a few meters away and started masturbating and showing us what he was doing.

**THANK  
YOU!**
